Table of Contents

9	Data Element Model	1
9.1	Introduction and Scope	1
9.2	Concepts and Engineering	3
9.2.1	Concept	8
9.2.2	Conceptual Value Domains	8
9.2.3	Data Element Concepts	9
9.2.4	Value Domains	9
9.2.5	Data Elements	12
9.2.6	Data Element Classifications	15
9.2.7	Compound Data Elements	15
9.2.8	Derived Data Elements	18
9.2.9	Data Element Model Process Model	18
9.2.10	The ISO 11179 Data Model Error and Ambiguity	20
9.2.10.1	ISO 11179 Data Model Error	20
9.2.10.2	ISO 11179 Ambiguity	23
9.3	Employing Data Element Model	25
9.3.1	Concepts	28
9.3.1.1	Concepts	28
9.3.1.2	Concept Structures	28
9.3.1.3	Concept Structure Types	30
9.3.1.4	Concepts, Data Element Concepts and Data Elements ..	32
9.3.2	Conceptual Value Domains	32
9.3.2.1	Conceptual Value Domains	33
9.3.2.2	Conceptual Value Domains Structures	35
9.3.2.3	Conceptual Value Domains Structure Types	37
9.3.2.4	Conceptual Value Domains, Data Element Concepts, and Data Elements	39
9.3.3	Data Element Concepts	40
9.3.3.1	Data Element Concept Data Hierarchies	40
9.3.3.2	Data Element Concepts	42
9.3.3.3	Data Element Concept Structures	44
9.3.3.4	Data Element Concept Structure Types	47
9.3.3.5	Data Element Concept Meta Category Value Assignment	49
9.3.3.6	Data Element Concepts and Data Elements	50
9.3.4	Data Elements	50
9.3.4.1	Data Element Data Hierarchies	51
9.3.4.2	Data Element Meta Category Values	53

9.3.4.3	Derived Data Elements	54
9.3.4.3.1	Derived Data Elements	54
9.3.4.3.2	Assign Data Elements to Derived Data Elements	56
9.3.4.3.3	Assign Derived Data Elements to Compound Data Elements	57
9.3.5	Data Element Classifications	58
9.3.5.1	Data Element Classification	59
9.3.5.2	Data Element Classification Structures	59
9.3.5.3	Data Element Classification Structure Types	62
9.3.5.4	Assignment of Data Element Classifications to Data Elements	64
9.3.6	ReEngineering	65
9.3.6.1	Reassign Data Elements to Business Domains	65
9.3.6.2	Reassign Data Elements to Data Element Concepts	67
9.3.6.3	Reassign Data Elements to Value Domains	68
9.3.6.4	Reassign Data Element Concepts to Concepts	69
9.3.6.5	Reassign Data Element Concepts to Conceptual Value Domains	70
9.3.6.6	Reassign Value Domains to Conceptual Value Domains	71
9.3.6.7	Reassign Value Domain Values to Value Domains	72
9.3.6.8	Promote Data Elements to Data Element Concept	73
9.3.6.9	Promote Data Element Concept to Concept	74
9.3.6.10	Remove Data Element Concept Meta Category Value Assignments	75
9.3.6.11	Remove Data Element to Meta Category Value Assignments.	77
9.3.6.12	Reallocate Business Domains	78
9.3.6.13	Reallocate Meta Category Values	79
9.3.6.14	Reallocate Meta Category Value Types	80
9.3.6.15	Reallocate Meta Category Value to Different Types	81
9.4	Error Classes	82
9.5	Data Element Model Summary	83
9.6	Questions and Exercises	85
10	Specified Data Models	91
10.1	Introduction and Scope	91
10.2	Concepts and Engineering	92

Table of Contents

10.2.1	Subject Area, Entities and Attributes	98
10.2.1.1	Subjects	98
10.2.1.2	Entities	98
10.2.1.3	Attributes	101
10.2.2	Key Support	104
10.2.2.1	Primary Keys	106
10.2.2.2	Foreign keys	109
10.2.2.3	Referential Integrity	111
10.2.2.4	Candidate Key	112
10.2.3	Attribute Value Domains	112
10.2.4	ReEngineering	113
10.2.5	Specified Data Model Maintenance	114
10.2.6	Specified Data Model DDL and Graphics	115
10.3	Employing Specified Data Models	116
10.3.1	Subjects & Entities	117
10.3.1.1	Subjects	117
10.3.1.2	Entities	120
10.3.2	Attributes	121
10.3.2.1	Creation	122
10.3.2.2	Maintenance	125
10.3.2.2.1	Maintain Attributes	125
10.3.2.2.2	Maintain Attribute Value Domains	129
10.3.2.2.3	Maintain Attribute Meta Category Values	131
10.3.2.3	Data Hierarchies	132
10.3.3	Keys	133
10.3.3.1	Primary Key	134
10.3.3.1.1	Primary Key Definition	134
10.3.3.1.2	Allocation of Attributes to the Primary Key	136
10.3.3.2	Foreign Keys	137
10.3.3.3	Candidate Key	142
10.3.3.3.1	Candidate Key Definition	142
10.3.3.3.2	Allocation of Attributes to the Candidate Key	144
10.3.4	ReEngineering	145
10.3.4.1	Reassigning Subjects to Subject	145
10.3.4.2	Reassigning Entities to Subject	146
10.3.4.3	Reassigning Entities to Entities	147
10.3.4.4	Reassigning Attributes to Data Elements	148
10.3.4.5	Reassigning Attributes to Entities	149

10.3.4.6	Synchronize Attribute Local Definitions	150
10.3.4.7	Promoting Attribute to Data Element	151
10.3.4.8	Removing Attribute Meta Category Values	152
10.3.5	SQL DDL Export & Import	153
10.3.5.1	Export	154
10.3.5.2	Import SQL DDL	157
10.3.5.3	Creating the SQL DDL Text File	158
10.3.5.4	Importing the SQL DDL	158
10.3.6	Data Model Trees	165
10.4	Error Classes	166
10.5	Specified Data Model Summary	167
10.6	Questions and Exercises	169
11	Implemented Data Models	175
11.1	Introduction and Scope	175
11.2	Concepts and Engineering	177
11.2.1	Forward Engineering	183
11.2.1.1	Schema Creation	183
11.2.1.2	Table and Column Creation	183
11.2.1.3	Table Maintenance	185
11.2.1.4	Column Maintenance	187
11.2.1.5	Relationship Maintenance	189
11.2.2	Original Creation	191
11.2.2.1	Schema Creation	191
11.2.2.2	Table Creation	191
11.2.2.3	Column Creation	192
11.2.2.4	Mapping Columns of Tables to Attributes of Entities	196
11.2.2.5	Key Support	200
11.2.2.5.1	Primary Keys	200
11.2.2.5.2	Foreign Keys	202
11.2.2.5.3	Referential Integrity	204
11.2.2.5.4	Candidate Key	205
11.2.3	ReEngineering	205
11.2.4	Column Value Domains	207
11.2.5	Implemented Data Model DDL and Graphics	207
11.3	Employing Implemented Data Models	208
11.3.1	SQL Data Types	210
11.3.2	Fact Data	210

Table of Contents

11.3.2.1	Schemas and Tables	212
11.3.2.1.1	Schema	212
11.3.2.1.2	Tables	215
11.3.2.1.3	Import Entities	217
11.3.2.2	Columns	223
11.3.2.2.1	Creation	223
11.3.2.2.2	Maintenance	225
11.3.2.2.3	Data Hierarchies	233
11.3.2.3	Keys	234
11.3.2.3.1	Primary Key	234
11.3.2.3.2	Foreign Keys	236
11.3.2.3.3	Candidate Key	243
11.3.2.4	ReEngineering	246
11.3.2.4.1	Reassign Columns to Attribute	246
11.3.2.4.2	Reassign Columns to Data Elements	248
11.3.2.4.3	Synchronize Columns, Data Elements and Attributes	249
11.3.2.4.4	Assign Columns to SQL Data Types	250
11.3.2.4.5	Reassigning Columns to Table	251
11.3.2.4.6	Synchronize Column Local Definitions	251
11.3.2.4.7	Reassigning Tables to Schema	254
11.3.2.4.8	Reassigning Tables to Tables	255
11.3.2.4.9	Promote Implemented Data Model to Specified Data Model	256
11.3.2.4.10	Promote Implemented Data Model Table to Specified Data Model	257
11.3.2.4.11	Promoting Column to Data Element	258
11.3.2.4.12	Remove Column Meta Category Values	260
11.3.2.4.13	Remove Column Attribute Assignments	261
11.3.2.5	SQL DDL Export & Import	262
11.3.2.5.1	Export	262
11.3.2.5.2	Import SQL DDL	267
11.4	Error Classes	271
11.5	Implemented Data Model Summary	272
11.6	Questions and Exercises	275
12	Database Object Models	281
12.1	Introduction and Scope	281
12.2	Concepts and Engineering	283

12.2.1	History of Database Objects	283
12.2.2	The Business Case for Database Objects	290
12.2.3	Database Object Classes and Enterprise Data Models	293
12.2.4	Traditional Computing Environments are Inadequate	294
12.2.5	ANSI Standard SQL and Database Objects	295
12.2.6	Centralized Versus Decentralized Data and Process Semantics	301
12.2.7	Database Object Composition and Execution Paradigm	307
12.3	Employing Database Objects	316
12.3.1	Database Objects	317
12.3.1.1	Database Objects	318
12.3.1.2	Database Domain Database Object Assignment	320
12.3.2	Database Object Structures	321
12.3.2.1	Database Object Tables	322
12.3.2.2	Database Object Table Assignment	323
12.3.2.3	Database Object Table Rationale	324
12.3.2.4	Database Object Table Rationale Update/Assignment	325
12.3.3	Database Object Table Process	326
12.3.3.1	Database Object Table Process	326
12.3.3.2	Database Object Table Process Column Assignment	329
12.3.4	Database Object Information System	330
12.3.4.1	Database Object Information Systems	331
12.3.4.2	Database-Object-Information-Systems Database-Object-Table-Process Assignment	332
12.3.5	Database Object States	334
12.3.5.1	Database Object State	335
12.3.5.2	Database-Object-State Database-Object-Information-System Assignments	338
12.3.6	Re-Engineering	339
12.3.6.1	Reassign Database Object to Database Domain	339
12.3.6.2	Reassign Database Object to Schema	340
12.3.6.3	Reassign Database Object Tables	341
12.3.6.4	Reassign Database Object Table Process Columns	342
12.3.6.5	Reassign Database Object State to Database Object Information Systems	343

Table of Contents

12.3.6.6	Reassign Database Object Table Processes to Database Object Information Systems	344
12.4	Error Classes	345
12.5	Database Object Model Summary	347
12.6	Questions and Exercises	349
13	Operational Data Models	355
13.1	Introduction and Scope	355
13.2	Concepts and Engineering	357
13.2.1	Forward Engineering	364
13.2.1.1	DBMS Schema Creation	365
13.2.1.2	DBMS Table Creation	366
13.2.1.3	DBMS Table Maintenance	367
13.2.1.4	DBMS Column Maintenance	369
13.2.1.5	Key Support	369
13.2.2	Original Creation	370
13.2.2.1	DBMS Table Creation	370
13.2.2.2	DBMS Column Creation	370
13.2.2.3	Key Support	372
13.2.2.3.1	Primary Keys	372
13.2.2.3.2	Foreign Keys	372
13.2.2.3.3	Referential Integrity	373
13.2.2.3.4	Candidate Key	373
13.2.3	Reverse Engineering	373
13.2.3.1	DBMS Identification	374
13.2.3.2	Database Identification	374
13.2.3.3	External File Identification	374
13.2.3.4	DBMS Schema Creation through Relationship Creation	375
13.2.3.5	Mapping DBMS Columns of DBMS Tables to Columns of Tables	375
13.2.4	DBMS Column Value Domains	376
13.2.5	Operational Data Model DDL and Graphics	377
13.3	Employing Operational Data Models	377
13.3.1	Reference	379
13.3.1.1	Database	380
13.3.1.2	DBMS (Database Management System)	382
13.3.1.3	DBMS Data Types	384
13.3.1.4	DBMS Data Type Pictures	385

13.3.1.5	Data Architecture Class	388
13.3.1.6	[Database] Nature	389
13.3.1.7	[Database] Production Status	391
13.3.2	DBMS Schema DBMS Tables	393
13.3.2.1	DBMS Schema	394
13.3.2.2	DBMS Tables	394
13.3.3	Import Tables	398
13.3.3.1	Import Schema Table Set	399
13.3.3.2	Import Table Tree	400
13.3.3.3	Import Single Table	402
13.3.3.4	Import Columns from a Table	402
13.3.4	DBMS Columns	403
13.3.4.1	DBMS Columns	404
13.3.4.2	Maintain DBMS Column Value Domains	407
13.3.5	Data Hierarchies	408
13.3.6	Keys	408
13.3.6.1	Primary	409
13.3.6.1.1	Primary Key Definition	409
13.3.6.1.2	Allocation of DBMS Columns to the Primary Key	411
13.3.6.2	Foreign	412
13.3.6.3	Candidate Keys	417
13.3.6.3.1	Candidate Key Definition	418
13.3.6.3.2	Allocation of DBMS Columns to the Candidate Key	419
13.3.6.4	Secondary	420
13.3.6.4.1	Secondary Key Definition	420
13.3.6.4.2	Allocation of DBMS Columns to the Secondary Key	422
13.3.7	ReEngineering	424
13.3.7.1	Reassign DBMS Columns to Column	424
13.3.7.2	Reassign DBMS Columns to SQL Data Types	425
13.3.7.3	Reassign DBMS Column to DBMS table	426
13.3.7.4	Synchronize DBMS Column Local Definitions	427
13.3.7.5	Reassign DBMS Tables to DBMS Schema	429
13.3.7.6	Reassign DBMS Tables to DBMS Table	430
13.3.7.7	Promote Operational Data Model to Implemented Data Model	431

Table of Contents

13.3.7.8	Promote Operational Data Model Table to Implemented Data Model	432
13.3.7.9	Remove DBMS table DBMS Column to Column Assignments	433
13.3.7.10	Remove DBMS Column View-Column Assignments	433
13.3.8	SQL DDL Export & Import	434
13.3.8.1	SQL DDL Export	435
13.3.8.2	Import	439
13.4	Error Classes	441
13.5	Operational Data Model Summary	444
13.6	Questions and Exercises	448
14	Data Interface Models	457
14.1	Introduction and Scope	457
14.2	Concepts and Engineering	459
14.2.1	Evolution of Bindings	459
14.2.2	View Data Models	463
14.2.3	XML-based Data Exchanges	468
14.2.3.1	Business Information System Approach	471
14.2.3.2	Enterprise Data Centric Approach	471
14.2.3.3	Responses	472
14.2.3.4	XML Tag Source	479
14.2.4	SOA Transaction Management	482
14.2.4.1	Current Environment	483
14.2.4.2	Solution Environment	484
14.2.4.3	Pathway to Solution Environment	486
14.2.4.4	Underlying Solution Engine	487
14.3	Employing Interface Data Models	492
14.3.1	View Data Models	492
14.3.1.1	View Functional Module	493
14.3.1.1.1	Views	493
14.3.1.1.2	Generate Views	495
14.3.1.1.3	View Columns	496
14.3.1.1.4	Generate View Columns	499
14.3.1.2	Assignments Functional Module	500
14.3.1.2.1	Assign DBMS Columns to View Column	500

14.3.1.2.2	Assign View Column to Compound Data Element	501
14.3.1.2.3	Assign View Column to Derived Data Element	502
14.3.1.3	View Column Mapping	502
14.3.1.3.1	View Column Structure	503
14.3.1.3.2	View Column Structure Process	505
14.3.1.3.3	View Column Structure Type	511
14.3.1.4	SQL View DDL	512
14.3.2	XML-based Data Exchanges	512
14.3.3	SOA Transaction Management	513
14.4	Error Classes	513
14.5	Data Interface Models Summary	514
14.6	Questions and Exercises	515
15	Work Plans	519
15.1	General Process Plans	528
15.1.1	Reverse Engineering	528
15.1.2	Forward Engineering	531
15.2	Data Semantics Management Project	532
15.2.1	Phase 1: Project Planning	532
15.2.2	Phase 2: Enterprise Data Element Engineering	534
15.2.3	Phase 3: Implementation	544
15.3	Specific Component Plans	546
15.3.1	Authoritative Data Sources (a.k.a., Master Data)	546
15.3.2	Enterprise Identifiers	547
15.3.3	Information Exchange Standard Specifications	550
15.3.4	XML Creation	552
15.4	Database Project subplans	554
15.4.1	Create Enterprise Data Elements	554
15.4.2	Create Specified Data Model	556
15.4.3	Create Implemented Data Model	557
15.4.4	Create Operational Data Model	559
15.4.5	Create View Data Model	560
15.5	Data Model Evaluation	560
15.6	Error Classes	565
15.7	Work Plans Summary	565
15.8	Questions and Exercises	569

Table of Contents
