September 2006 Announcement for Whitemarsh on Database Website
www.wiscorp.com

Greetings:

This email is the news letter for September 2006. There are three items in this announcement:

- The Data Interoperability Community of Interest Handbook
- Next Generation Data Interoperability It's all About the Metadata
- The Short Paper Series edition

The Data Interoperability Community of Interest Handbook is finished. The table of contents and the first chapter are posted for review. A pre-publication sale announcement will occur in two weeks. The table of contents and Chapter 1 link is: www.wiscorp.com/dicoihb.pdf

The second item is a paper that Mike Gorman co-authored with Dr. Andreas Tolk of Old Dominion University, and Leslie Winters of the DoD's Joint Forces Command. This paper: "Next Generation Data Interoperability, It's All About Metadata" was delivered to the September 2006 Fall Simulation Interoperability Workshop, in Orlando, FL. This is a highly informative paper and we recommend that serious data professionals read it. We are really impressed with the Levels of Interoperability from Dr. Tolk. Whitemarsh is going to incorporate these levels into the Data Interoperability Community of Interest Handbook. The first chapter and table of contents of our co-authored book is located at: www.wiscorp.com/ngmetadata.pdf

The third item is the latest edition to the Whitemarsh Short Paper Series, Database Schema Management. This paper focuses on the creation of enterprise-wide semantics from existing database schemas. Explained is the overall process, the creation of a layer of common semantics, the data model templates, and the enterprise-wide data element semantics. This short paper is located at: www.wiscorp.com/sp/sp05.pdf

Keep in mind, the complete short paper series publications remain available at: www.wiscorp.com/short_paper_series.html

Regards,

Michael M. Gorman
Matthew G. Gorman
